A Uniform 360° Light-Emitting Design

The new LED color module features a new, unique interior lens construction that achieves a fuller, more uniform 360° degree light output. Light color is vibrant with more emission area for reliable indication from further distances.

LCE-A Series (φ40) LR4 Series (φ40)

More than Twice the Light Output*

The LR Series lens distributes light more efficiently, increasing luminous intensity by more than double that of our current models.

* Based on the φ40 Red LED Model

Unique Method of Fully Enclosed Sound Module

Inspired by a drum percussion instrument, the fully enclosed sound module is able to more efficiently vibrate sound waves, producing even 360° omnidirectional sound resonance. Resistance to water and dust is also increased.

LHE Series (φ70) LR7 Series (φ70)

(Buzzer No.3) Rapid Hi-low Sound 2016Hz/3012Hz (Buzzer No.4) Sweep Sound 1000Hz - 4032Hz (changing)

New Sounds Heard Above the Noise

4 built-in buzzer sounds. Buzzer sounds No. 3 and No. 4 are designed at a higher variable frequency to be heard above the noise of surrounding machinery. Alternatively, a sound reduction function of approx. -10dB is included for use in quieter environments.

* Four Buzzer Sounds

- No.1 Rapid Intermittent sound
- No.2 Continuous sound
- No.3 Rapid Hi-low
- No.4 Sweep sound

Modular System Design

Traditional stack lights typically require additional threaded shafts or tools to reconfigure LED units. The LR modular system design redefines signal tower assembly by making customization and repair seamless.

LED/Buzzer Unit Removal

- 1) Hold the LED/Buzzer Unit or Base and turn counter-clockwise to unlock the unit.
- 2) Pull straight up to remove the unit.

LED Unit Attachment

- 1) Align the bar markings on the LED Unit.
- 2) Aligning the bar with arrow, turn clockwise to lock.

Reorganizing Modules is Effortless

The LR modular system makes reconfiguring the color order simple with its twist-and-lock design. Replacing and reconfiguring LED units or adding a buzzer module is easier than ever.

Smooth Surface

The LR base, LED units and buzzer modules secure together tight and flush, creating a smooth surface, ideal for easy cleaning and water run off.

Environmental Performance

Features a rugged structure with the following ratings: IP65 / NEMA Type 4x, 13 withstands various environmental conditions, such as water and dust.

Upgraded Materials

Upgrading from an ABS to Polycarbonate material, and silicon resin O-rings, results in a more lightweight, shock and water resistant product.
