

Building Innovative Solutions for a More Secure, Efficient **Tomorrow**

In this pivotal period, the industrial sector must lead the charge in reducing carbon footprints. At ICON, we are fully prepared and deeply committed to this mission.

Let's build better future together

Industrial process systems are advancing globally, prompting a shift in methodologies due to climate change. Traditional materials like alloys and specialty metals are increasingly being replaced by engineered thermoplastics, which offer greater resilience and longevity in diverse environments.

As a world leader in thermoplastic instrumentation equipment, we integrate decades of engineering expertise into highly sustainable products. In this critical time for the planet, we remain committed to challenging conventions and pioneering new solutions, driven by our goal to make the world a better place.

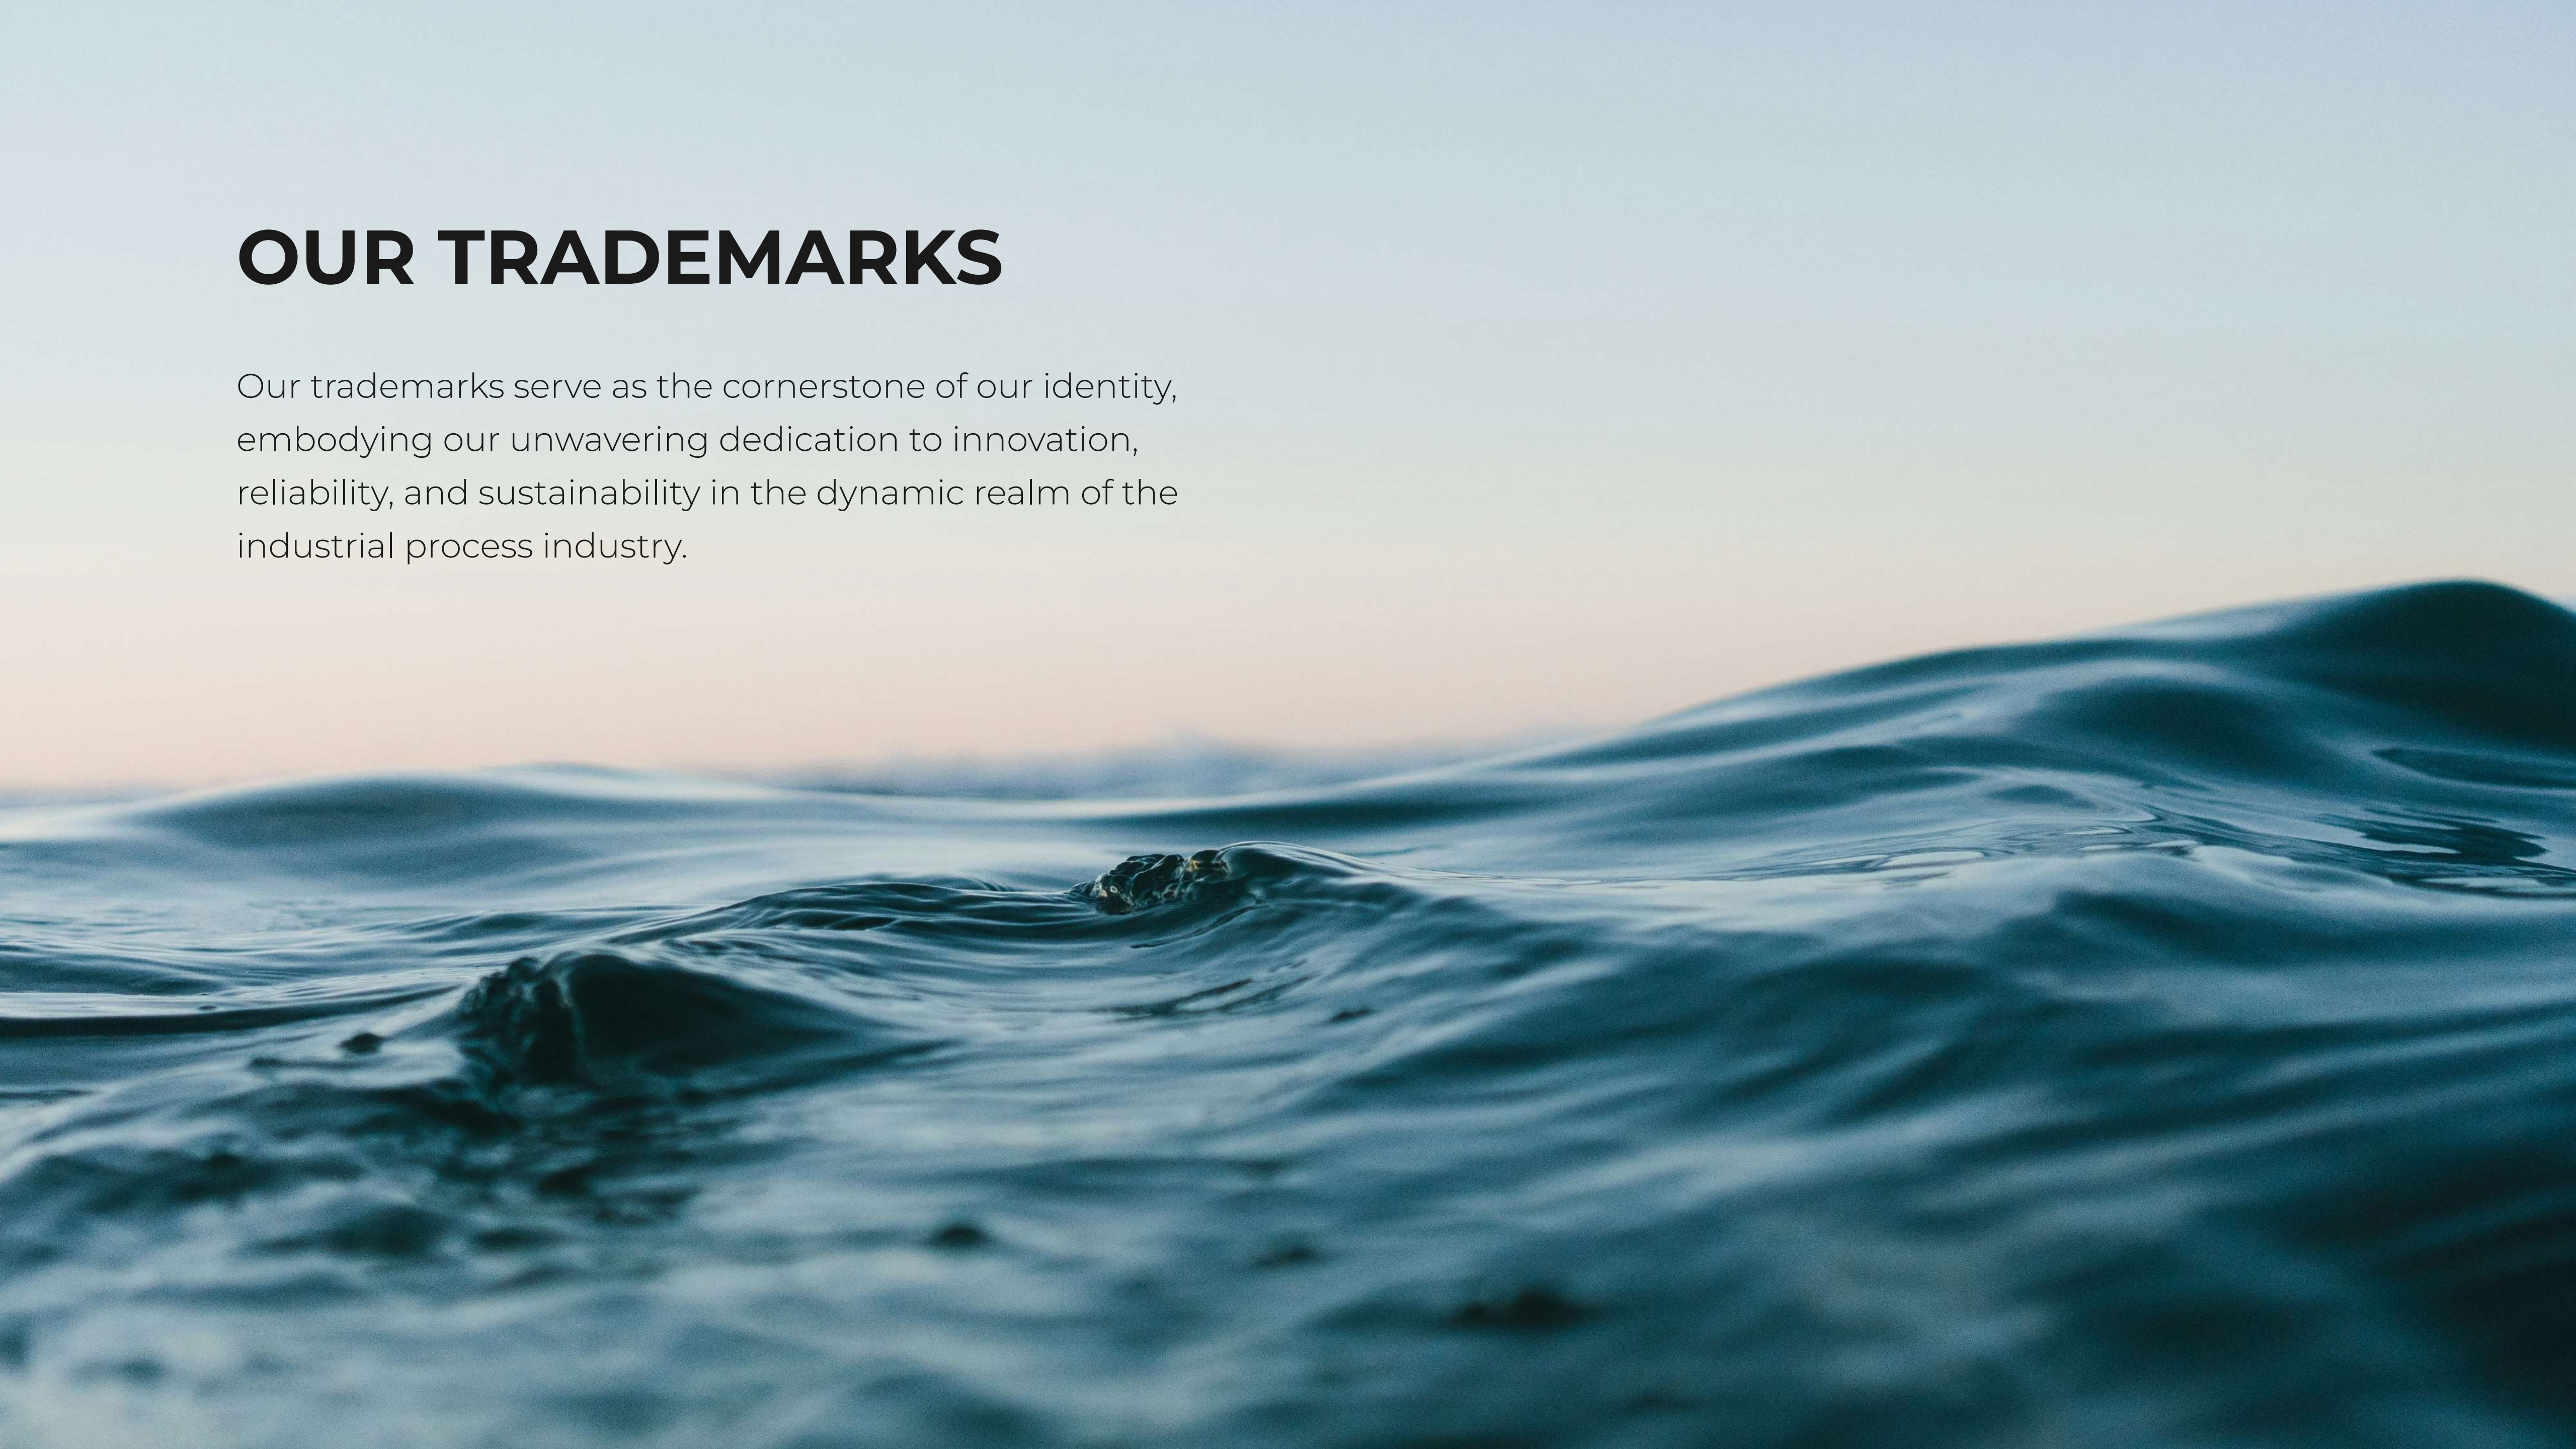

WHY ICON?

We are guided by the sustainability of corrosion-free instrumentation products and the resilience of high-performance engineering. Our strength stems from our engineering legacy, the talent within our team, and our commitment to collaboration with our customer base and stakeholders.

We pioneer sustainable thermoplastic equipment with fearless and focused determination, aiming to create better products for a better world for tomorrow.

OUR TRADEMARKS

Our trademarks serve as the cornerstone of our identity, embodying our unwavering dedication to innovation, reliability, and sustainability in the dynamic realm of the industrial process industry.

Experience unmatched precision and performance in level measurement with **LevelPro**[®]. Trust **LevelPro**[®] to deliver the accuracy and reliability your applications demand, ensuring optimal level control and efficiency.

Elevate your flow measurement accuracy and efficiency with **Truflo**[®] — our premier brand offering an extensive range of precision-engineered flow related products. **Truflo**[®] provides the reliability and performance you need for optimal process control.

Setting the standard in leak detection, our **LeakPro**[®] trademark offers a comprehensive range including Leak Detection Capacitance Sensors, Leak Detection Cable, and Leak Detection Alarms.

Delivering precision and reliability in analytical solutions, our **ProCon**[®] trademark offers pH, ORP, and Conductivity sensors alongside advanced controllers.

Empowering seamless connectivity, our **IZON**[®] trademark encompasses LoRa Wireless Transmitter, NB-IoT Cellular Transmitter, Multi-Channel Controller, and Solar Battery Pack.

About Us

Icon Process Controls stands as a global leader with over 30 years of unparalleled expertise in corrosion-resistant industrial fluid handling and process control equipment. We offer the industry's most comprehensive range of all-plastic instrumentation products, all backed by North America's largest inventory. Trust ICON Process Controls to deliver innovative solutions, exceptional reliability, and the industry-leading support that your business deserves. Choose excellence, choose ICON.

Uncompromised Quality

At Icon Process Controls, quality is not just a standard; it's our unwavering commitment. We meticulously uphold the highest standards, ensuring uncompromised quality in every product we deliver. Our relentless dedication to reliability and performance distinguishes us in the industry, making ICON Process Controls the trusted choice for all your fluid handling and process control needs. Experience the ICON difference—where exceptional quality meets unmatched expertise.

Let's Build A Better Future **Together**
